(54) Title: HYDROXYPYRIDINONES FOR THE LOCAL TREATMENT OF SKIN MICROCIRCULATORY DISORDERS

(57) **Abstract:** The application of hydroxypyridonone in effective amounts as external agent for patients suffering from skin micro-circulatory disorders (SMD) provides for a significant amelioration of subject conditions. Accordingly, the new use of hydroxypyridonones as external anti-inflammatory agent thereby combined with the depletion of hemosiderin residues offers a suitable treatment to SMD sufferers.
